Description

FormSafe is a unique bituminous, pre-formed flexible self-adhesive waterproof membrane. Consisting of a 1mm thick rubberised waterproof layer, incorporating a fabric mesh on one side.

The membrane is self-adhesive and comes on a roll. Once installed tiles can be applied immediately - there is no curing time.

Although particularly suited to floor applications FormSafe can also be applied to walls as an additional precaution. However, there is a maximum weight limit for wall mounted tiles when using FormSafe and this should not exceed 20kg/m².

FormSafe can be used with under floor heating. Note: Maximum effective temperature for FormSafe is 32°C and should not be exceeded. Electrical heating max 150w.

AKW offer 2 different kit sizes for FormSafe, 5m² and 10m².

At A Glance:
