Description

BB Complete - Coloured Panel Sealant - 290ml

Busboard Nuance panels are totally impervious to water but all joints must be sealed and protected against moisture ingress. This applies to walls, at the floor level and where panels sit on a shower tray.

The BB Complete adhesive has been specifically developed for this job. Polyurethane based, it is a technically superior bonding and seaming adhesive. It is flexible, super strong and does not break down over time like silicone, giving the assurance of a professional long lasting fit.

BB Complete must be used to validate the 15 year guarantee.

BB Complete is available in 10 colours to match in with the full Nuance range of designs.

Note: For bonding panels to the walls and where the adhesive is not seen there is a cost effective neutral colour.
