Description

Nuance laminate tongue & groove wall panelling by Bushboard - 600 x 2420h x 11mm

These panels have tongue and groove edges at either side to fix to other panels in the middle of a run. The

joints are virtually invisible and don't require jointing strips like other panelling products.

Nuance laminate panelling is an ideal alternative to tiling. They can be used to panel out the shower area, the wall around the bath and even around the bath itself. The large format panels with postformed outer edges means there are no extrusions and few visible joints to distract the eye.

Easy to Install

Nuance panels can be cut and installed in a matter of hours. The tongue and groove panels can be jointed with bespoke adhesives. This gives you joints that are 100% water tight and also virtually invisible to the eye.

At a Glance:

- **Width 600mm**
- **Height 2420mm**
- **Thickness 11mm**
- Quicker and easy to install than tiles
- Easy maintenance
- Almost invisible joints - no need for joining or finishing strips
- 100% waterproof unlike other boards that have a wood core that can swell if compromised
- Works perfectly with a flush fitting wet room / shower tray to create a wet room area
- 15 year guarantee if installed using BB Complete adhesive

Please note:

Patterns are not designed to match across tongue and groove joints.
