Description

The 8 Series walk in Showerwall with side panel is stylish yet functional by design. The simplicity of large glass panels forms a luxurious walk in shower in your wet room or bathroom. It is not only very practical but the ease of walking into your shower with no doors to negotiate needs little explanation. The addition of the swivel panel is stylish yet functional by design, the ingenious 300mm swivel panel can be adjusted to deflect shower spray.

Frameless 8mm toughened safety glass this panel stands at an impressive 2000mm high (2015mm including bracing bar) and is suitable for either a recess or a corner situation - its guaranteed to make a statement in any bathroom.

Apply to a low level tray such as our MStone range or to a tiled floor to achieve a wetroom look for that sophisticated chic feel. With MerShield Stayclear Protected glass as standard within the Merlyn Series 8 range this screen is 'Easy clean'.

All Merlyn 8 Series shower screens have the Merlyn Lifetime Guarantee.

Please note:

Screen sizes listed refer to main panel excluding 300mm swivel panel. Therefore 700mm panel has a further 300mm to be added for the swivel panel, giving a total length of 1000mm if fully extended etc.

Features

* European safety glass approved - EN14428 & EN12150

#Sizes shown are nominal. All panels are undersized by 32mm to allow for tiling when fitting to shower trays.

Mersheild Stayclear

Mersheild Stayclear acts as a protective coating which when applied to glass, helps the glass to remain shiny and new without the need for tiresome cleaning.

When cleaned correctly it helps prevent the build up of limescale and soap deposits making the shower glass "Easy to Clean".

How it Works:

Mersheild Stayclear coating creates a smooth layer over the surface of natural glass, lowering surface friction, making it easier for water, soap and lime deposits to run off the glass.

Screen options:

Angled Stabilising Bar - for use to stabilise the screen against the fitting wall. Ideal for use when the gap from to

far wall is greater than the 1000mm of the standard stabilising bar.
